### Notes:

The 2024 dates for British Summer Time are between 31<sup>st</sup> March and 26<sup>th</sup> October inclusive. This timetable can be used in recurrent years, by making the appropriate adjustment for when British Summer Time begins/ends in subsequent years; and if a leap year, the 29<sup>th</sup> February time can be included.

This timetable has a maximum margin of error of 8 minutes. From the analysis of the data, the authors are confident that the time of fajr has set in at the above times; but it cannot be stated that the time of fajr has not set in during the 8 minutes prior to the above times.

Therefore, in the month of Ramaḍān (or when fasting), when applying this timetable it is recommended that the time of suḥūr ends 8 minutes prior to the above times.
