Notes:

The 2018 dates for British Summer Time are between 25th March and 27th October inclusive. This timetable can be used in recurrent years, by making the appropriate adjustment for when British Summer Time begins/ends in subsequent years; and if a leap year, the 29th February time can be included.

This timetable has a maximum margin of error of 8 minutes. From the analysis of the data, the authors are confident that the time of fajr has set in at the above times; but it cannot be stated that the time of fajr has not set in during the 8 minutes prior to the above times.

Therefore, in the month of Ramaḍān (or when fasting), when applying this timetable it is recommended that the time of suḥūr ends 8 minutes prior to the above times.
